OBJECTIVE

Computer Science & Data Science student at Augustana College seeking software engineering internship opportunities. Experienced in AI and web development with a passion for building user-focused applications and growing as a developer.

EDUCATION

Bachelor of Arts in Computer Science and Data Science
Augustana College | Rock Island Illinois
Minor: Mathematics

Expected: May 2027

RELATED EXPERIENCE

Web Development Intern

Feb 2026 - Present

EDGE Center | Rock Island Illinois

- Built 7 responsive web pages using HTML, CSS, and JavaScript, improving layout consistency across multiple application pages
- Resolved 15+ UI and layout issues, improving responsiveness and user navigation across devices
- Collaborated using Git and GitHub to manage version control and maintain organized development workflows

AI Intern

Dec 2025 - Feb 2026

Fuse Machines | Kathmandu, Nepal

- Built machine learning workflows using Python, Pandas, and Scikit-learn to process datasets containing 12,000+ rows
- Trained and evaluated classification models including Logistic Regression, Decision Tree, K-Nearest Neighbors (KNN), and Naive Bayes
- Performed data preprocessing, cleaning, and feature engineering to improve model input quality
- Evaluated model performance using accuracy, precision, and recall metrics to compare algorithm effectiveness

Full-Stack Intern

May 2024 - Aug 2024

Buddha Tech | Kathmandu, Nepal

- Developed full-stack web features using React, Node.js, Express, and REST APIs across multiple web applications
- Identified and resolved 10+ front-end issues, improving UI responsiveness and page usability
- Integrated front-end interfaces with backend services to support dynamic user functionality

PROJECTS

Real-Time Object Detection & Automation System (Personal Project)

<https://github.com/Zuri-1/Aimtrainer-Aimbot.git>

Apr 2025 - Jul 2025

- Engineered a Python-based automation tool to detect and interact with on-screen targets in real time using computer vision techniques
- Implemented object detection using YOLOv5 and OpenCV to identify targets with high accuracy under dynamic conditions
- Automated mouse movement and click actions using PyAutoGUI to simulate precise and responsive targeting behavior
- Created modular scripts (dot_detector, dot_generator) to test, train, and refine object detection models
- Gained hands-on experience with OpenCV, NumPy, and real-time image processing workflows

Spam Email Classification Model

https://colab.research.google.com/drive/11cQek_z7p8_-OHPWETIBELInQ8kDcEfl

Jan 2025 - May 2025

- Developed a machine learning pipeline to classify emails as spam or non-spam using natural language processing techniques
- Implemented and compared multiple classification models, including Decision Tree, Logistic Regression, and K-Nearest Neighbors (KNN)
- Visualized and Evaluated model performance using metrics such as accuracy, precision, and recall assessing classification effectiveness
- Utilized Python libraries including scikit-learn, pandas, NumPy, and Matplotlib for data processing, modeling, and visualization

Augustana Recreation Swipe-In Tracker

<https://github.com/AugustanaCSC490Spring2026/BBLS.git>

Feb 2026 - Present

- Delivered a web-based system to streamline student access to campus recreation facilities with a one-scan automated check-in process
- Designed and integrated a cloud-backed database to store and analyze attendance data and track facility occupancy
- Built a responsive front end using React, JavaScript, HTML, and CSS to enhance usability and efficiency
- Collaborated in a team-based development environment using Git and GitHub, contributing to version control, feature development, and code integration

SKILLS

Programming Languages: Python, Java, JavaScript, PHP

Tools and Technology: Git, GitHub, VS Code, NumPy, Pandas, Tableau, Excel, Matplotlib, GoogleColab

Frameworks and Libraries: React, Node.js, OpenCV, PyTorch, YOLOv5, scikit-learn

Languages: English, Nepali, Newari, Hindi

ACTIVITIES

Vice President

April 2026 - Present

Omicron Sigma Omicron (OSO)

- Coordinated chapter operations, member engagement, and event planning to support organizational growth and participation
- Organized merchandise planning and inventory management, including researching vendors and coordinating apparel orders

Member

Sep 2024 - Present

Augustana Club Volleyball

- Competed in intercollegiate volleyball tournaments while balancing academic workload
- Highlighting the importance of trust, consistent effort, and supporting teammates while staying focused and committed to continuous improvement

Captain

Sep 2023 - Present

Augustana Esports

- Led team coordination during competitive matches, managing communication strategies under high-pressure scenarios
- Analyzed complex in-game scenarios and communicated strategic adjustments to teammates during high-pressure matches
